most customers in Hong Kong

About US

■ We are Amosola

Amosola Ltd was established in 2018 when the Hong Kong government, together with HK Electric Investments Limited and CLP Power Hong Kong Limited, launched the “Feed-in Tariff (FiT)” program to purchase electricity generated from renewable energy systems at the highest repurchase price of electricity worldwide. With high-quality products and services, Amosola quickly entered the market and became the No. 1 company engaged in solar energy system preferred by most people in Hong Kong. It has completed more than 1,000 projects, ranking first among peers.

Under the premise of promoting the development of renewable energy, Amosola provides one-stop solar solutions for residential and commercial customers, from system design, installation, equipment maintenance, development of environmental protection investment plans, to customer financing. Its unparalleled products and services have.

Amosola Service

1. Installation of solar energy system

Amosola provides customers with one-stop solar energy system installation. The service scope covers residential projects (villa, detached house) and commercial projects (such as commercial buildings, industrial buildings, warehouse roofs, agricultural land), surveys, solar energy system design, installation, maintenance, and even the application of the "FiT Program". The whole process is followed up by specially- assigned staffs.

2. Solar energy industry investment platform (ey service for 2020-2025)

A variety of investment models are available in Amosola, including profit sharing, financing cooperation, joint venture sharing, and rooftop lease model to meet the needs of different customers. Even if the customer is not the property owner, doe not have the facilities for installing the solar energy system, or hesitates

because of the initial investment cost, he can rely on Amosola investment platform to cooperate with other investors and share the huge electricity price.

3. Maintenance and cleaning

In order to help customers maximize the efficiency of solar energy systems, Amosola provides a series of maintenance and cleaning services for customers. In addition to the maximum 15-year warranty period, Amosola also assists customers in cleaning solar panels to keep contact with customers. Excellent after-sales service makes Amosola stand out in the industry.

Boasting the self-deigned solar energysystem, Amosola adopts a variety of the world' s best solar components, including solar panels from Jinko Solar, the world' s largest solar panel manufacturer, Sungrow inverters, the 2nd large inverter maker in the world, and self-developed brackets, in a bid to bring customers high-quality solar products.

Shareholder Profile

Jeff Lee On Kit *Founder-CEO of Amosola Ltd*

Jeff Lee On Kit, the Founder-CEO of Amosola Ltd, graduated from University of South Australia. After graduation, Jeff then worked in a famous engineering company. With his high efficiency, earnest and enthusiastic work attitude which gained his superiors' praises and recognition, he was promoted to the position of senior manager only within a few years.

"The very beginning mind itself is the most accomplished mind of true enlightenment". Although a promising career path was placed in front, Jeff decided to step out from the comfort zone and established an engineering company in 2007 which provides interior design and decoration services for different industries.

In late 2018, Jeff showed his considerable business acumen, he set up his network and jointly founded Amosola Ltd with his friends to promote the development of local renewable energy.

Amosola developed rapidly since incorporation. It has gained the trust of more than a thousand customers, becoming the leading solar system contractor with the highest market share in Hong Kong.

The blooming of business brings a lot of remarkable recognitions to Amosola by honored with different awards, such as Innovation and Start-up Business Award, Hong Kong Green Awards, Startup Award, and interviewed by the well-known media, including the Hong Kong Radio, TVB Pearl, ViuTV and Capital Magazine.

Jeff is also invited by major newspapers as columnist to share his views and experience on environmental protection.

Sammy Lau Ching Yin *Sales Director*

Sammy Lau Ching Yin, the Sales Director of Amosola, also graduated from University of South Australia. He first joined Ford after graduation as a salesperson. His hard-work, passion and outstanding selling skills made him the top 5 best salesperson in South Australia.

Later, Sammy initially served as assistant manager and successively be the General Manager of the Top 3 garment accessory company in Hong Kong after his return.

A dedicated warrior never ceases to pursue higher achievements, Sammy resolutely decided to jump out from a highly paid job and joined Amosola as the sales director in 2018, successfully leading Amosola to a new high in sales.

Wilson Wong Ming Hong *Project Director*

Wilson Wong Ming Hong, the Project Director of Amosola, is in charge of Amosola's logistics, project installation and materials supply.

Wilson has developed strong interest in engineering and construction since his childhood. He accumulated solid and professional engineering knowledge through his long-term study of object structuring and different forms of combination methods.

Chris Chow Ka Leung *Project Director*

Chris Chow Ka Leung, the Project Director of Amosola, is sophisticated in running business as he has consolidated profound experience from managing his family clothing company since his high school graduation. He has a rich business networks and relationships in South East Asia.

Chris and Jeff co-founded an interior design company in 2007. In 2018, with the launch of "Renewable Energy Feed-in Tariff Plan", they further founded Amosola Ltd.

Chris is in charge of the engineering project operation and product development. He successfully assisted Amosola to obtain the Hong Kong agency right of Jinko Solar, Sungrow and INVT inverters, which are the world largest solar panel manufacturer and well-known suppliers. This laid one of the cornerstones of Amosola's success.

Snowball Effect

The only company in the industry that provides 100% guarantee for connecting to the power grid of electric power company

Amosola provides the highest completion rate of grid-connection in the industry - 100%, so as to ensure customers to enjoy the benefits of on-grid price program. Meanwhile, in response of market demands, we have designed independently holders that are suitable for installation in local buildings, making our solar energy system more attractive than that of the peer and improving the sales.

Diversified investment programs

Comparing to other companies in the industry, Amosola provides diversified services ranging from assistance to solely-invested customers in installing solar energy system to services including financing, leasing, construction and profit sharing for potential investors, as well as joint contribution for building solar energy system, so as to assist different customers to obtain considerable solar gains every month. Moreover, all investments have an estimated ROI reaching at least 20% every year, thus its diversified financing package has an edge over other competitors.

Excellent and improved team

As the only one solar energy system company that has a complete team in Hong Kong, Amosola has not only professional salesperson, but also creative marketing publicity department, self-owned delivery fleet, installation team with 10 years of experience, and stable supplier. Thus, the company provide a full package service from sales, detection to installation. A designated person who follows up the whole process would bring more excellent reliability than the competitors.
